Description

Technology Unlimited Group (TUG) is seeking a highly motivated C++ Software Engineers to support the development and integration of Command, Control, Communications, Computers and Intelligence (C4I) Systems. The position will be at the TUG office in Point Loma, CA and/or customer sites in San Diego. We are seeking engineers to add to our team to perform the full range of duties including software development, integration, and testing.

Required Skills and Qualifications:

- 5 years Software Development experience using C++.
- Experience with Agile SW Development.
- Experience with Object Oriented analysis and design using common design patterns.
- Able to write well-designed, testable, efficient code and associated documentation.

- Develop and expand features and products using C++.
- Debug, test, and fix errors
- Document code development and revisions
- Create and use software tools to help automate writing code.
- Strong problem solving and critical thinking skills.
- Strong attention to detail.
- Proficiency in oral communications skills.
- Ability to work with and communicate with project team members and customer representatives.
- Bachelor degree from an accredited university in the area of Computer Science, Computer Engineering or a related Science discipline.
- Eligible for a government clearance.
- Must pass Pre-Employment Drug Test.

Desired Skills and Qualifications:

In addition to the required skills, the ideal candidate may have one or more of the following:

- Familiarity with Continuous Integration / Continuous Delivery (CI/CD) and desire to learn.
- Eagerness to learn and continuously improve.
- Possess an Active government Security Clearance.

Technology Unlimited Group is an Equal Opportunity Employer. Employment decisions are made without regard to race, color, religion, national origin, gender, sexual orientation, gender identity, age, physical or mental disability, genetic factors, military/veteran status or other characteristics protected by law.
