## Summary

Posted: Jan 12, 2024

Weekly Hours: 40

Role Number:200531541

Are you a fearless thinker? Do you love the challenge of advancing a widely accepted technology? In the Wireless Software group, you'll be responsible for bringing groundbreaking wireless connectivity to the world through Wi-Fi, Bluetooth, GPS, and more. You'll design, develop, and patent the next generation of our state-of-the-art connectivity technologies. You'll collaborate across departments to help craft wireless solutions that elevate the customer experience with Apple products and services. Our goal is to ensure nothing stands in the way of our customers' connections with their devices. If you join us, you'll help build world-renowned wireless systems so seamless that they almost feel like magic. Join the Wireless Technologies and Ecosystems organization and be part of an extraordinary team of engineers. We work with cross functional teams to drive innovation and develop products used by millions worldwide. Apple's Wireless Software Architecture team is seeking dedicated, highly motivated and self-directed engineers to work across layers on innovative cellular technologies. The position involves identifying and developing core wireless technologies that solve everyday problems for customers using iPhone, iPad, Watch and other wireless product lines.

## Key Qualifications

- Passionate and inquisitive with a focus on solving everyday problems in innovative ways
- Attention to the smallest details that are meaningful to customers

## Description

Apple's Cellular Software team is seeking passionate, highly motivated and focused engineers to work across layers on groundbreaking cellular technologies. The position involves identifying and/or developing core cellular technologies that solves everyday problems for customers using iPhone, iPad, Watch and other wireless product lines. This team takes pride in not just coming up with proven software designs but also in disrupting traditional models of the cellular ecosystem. We go above and beyond to bring user experience to the next level. Working as a part of an extraordinary development team, we are searching for a highly motivated software developer. In this position, you will have the opportunity to develop exciting features for Apple's next generation products. You work will involve wireless software and protocol development. Your contributions will make a clear difference towards future Apple products.

Education & Experience

BS/MS in Computer Science or equivalent

Pay & Benefits

At Apple, base pay is one part of our total compensation package and is determined within a range. This provides the opportunity to progress as you grow and develop within a role. The base pay range for this role is between \$52.98 and \$79.75/hr, and your base pay will depend on your skills, qualifications, experience, and location.

Apple employees also have the opportunity to become an Apple shareholder through participation in Apple’s discretionary employee stock programs. Apple employees are eligible for discretionary restricted stock unit awards, and can purchase Apple stock at a discount if voluntarily participating in Apple’s Employee Stock Purchase Plan. You’ll also receive benefits including: Comprehensive medical and dental coverage, retirement benefits, a range of discounted products and free services, and for formal education related to advancing your career at Apple, reimbursement for certain educational expenses — including tuition. Additionally, this role might be eligible for discretionary bonuses or commission payments as well as relocation. Learn more about Apple Benefits.

Note: Apple benefit, compensation and employee stock programs are subject to eligibility requirements and other terms of the applicable plan or program.
